# APPRECIATION

The success of the Nevada Uniform Crime Reporting Program hinges on the complete, accurate and timely participation of all of Nevada's law enforcement agencies. The program was established with the support of criminal justice and law enforcement agencies statewide in July of 1991 (Nevada Revised Statute 179A.078).

Although responsibility for actual development and execution of the program was vested in the Nevada Highway Patrol, the individuals at the municipal, county and state levels who submit the raw data are the entities ultimately critical to its viability. Accordingly, we recognize the following dedicated people.

In the interest of more effective law enforcement and the residents of Nevada, the fifth edition of *Crime and Justice in Nevada 1998* is submitted.

I believe you will find this report helpful in developing appropriate responses to the changing faces of crime. It provides valuable information in helping law enforcement personnel and members of State and local government to plan crime prevention programs. The information also will help in assessing crime patterns and in developing legislation to combat criminal activity.

The Nevada Highway Patrol-Records and Identification Services Bureau appreciates the cooperation of all police agencies, sheriffs offices and others that have provided information for this report. The contributions of those involved in the preparation of this report permit this Department to provide a comprehensive picture of crime in Nevada.

Therefore, it is a pleasure for me to inform you that with this report we mark a continued decline of crime in Nevada. Violent crime dropped by 16.7 percent in 1998, while non-violent crime dropped by 8.5 percent. The overall crime rate is 9.6 percent lower than last year. Those of us, who work in the profession of law enforcement, and witness on a daily basis the heartbreak and loss caused by crime, are appreciative of any decreases.

With this said, there is no single cause for crime, just as there is no one single solution. The criminal justice community and particularly law enforcement, the legislature, the courts and the community are all key players in this continuing battle. If Nevada is to become a safer place; we must all contribute to the effort. Without the support of law-abiding citizens, criminal justice authorities cannot possibly hope to control the rate of criminal activity.

Sincerely,

A handwritten signature in dark ink, appearing to read "M.E. Hood".  
Colonel Michael E. Hood  
Chief

## INTRODUCTION

---

The Uniform Crime Reporting (UCR) Program is a nationwide cooperative effort of over 16,000 city, county and state law enforcement agencies voluntarily reporting data on crime. The monthly contributions to Nevada's current program, with 36 local law enforcement and fire response agencies reporting full-time, represents a solid effort in establishing an effective statewide criminal justice information system (CJIS). We invite remaining non-participating local law enforcement and fire response agencies to join their peers in this effort and participate in this important program.

**Inquiries concerning Uniform Crime Reporting may be directed to:**

Ideally, UCR data will eventually merge with that of the other major components of the criminal justice system (i.e., prosecutors, courts, corrections) to form an integrated system for the exchange of vital management information. The availability of such data will enhance law enforcement's proactive response to crime and justice in Nevada. The Nevada Highway Patrol has administered the UCR Program as a statewide, standardized method of collecting statistics on crime as it is reported to law enforcement. The UCR Section also produces a reliable set of criminal statistics for use in law enforcement administration, operation and management. Additionally, Nevada's statistics are forwarded monthly to the Federal Bureau of Investigation for inclusion in its annual report, "Crime in the United States."

Over the years, we hope UCR data will be used as a leading social indicator. With this annual report, Nevada's citizens can look to UCR as the primary information source on the nature and extent of crime in Nevada. Criminologists, sociologists, legislators, state and local planners, the media and academicians can use the statistics for wide and varied research, planning and other applications.

## NATIONAL UCR REPORTING SYSTEM

---

During the 1920's, the members of the International Association of Chiefs of Police (IACP) formed the Committee on Uniform Crime Reporting with the intent to develop a standardized system of police statistics. After much study of state criminal codes nationwide and the methods of bookkeeping, the committee completed a report plan which identified seven basic offense definitions and data requirements.

In January of 1930, 400 cities representing 20 million inhabitants in 43 states began participating in the UCR Program. In that same year, Congress authorized the Attorney General of the United States to gather crime information. He, in turn, designated the FBI to serve as the national clearinghouse for the collection of crime statistics. Since that time the FBI has continued to serve as the coordinator for the UCR Program. It has since grown to a system representing over 16,000 municipal, county and state law enforcement agencies voluntarily reporting data on crimes brought to their attention.

The National Sheriff's Association established a Committee on UCR in June of 1966. It serves jointly with the IACP UCR Committee in an advisory capacity to encourage sheriffs throughout the country to participate in UCR.

In 1979, a congressional mandate made Arson the eighth Part I Index offense in the UCR program.

For over 62 years, the UCR program remained virtually unchanged in terms of the number of elements and types of data collected and disseminated. By the 1980's it had become obvious the nature of modern day law enforcement had outstripped the capabilities of the UCR system, which was in need of a thorough evaluation.

## **NATIONAL UCR REPORTING SYSTEM**

---

Commencing in 1982, the FBI and the Bureau of Justice Statistics (BJS) began a joint venture to formulate a phased-in redesign effort intent upon meeting the needs of law enforcement into the 21st century. Utilizing the services of Abt Associates of Cambridge, Massachusetts, the joint steering committee produced a draft report entitled, "Blueprint for the Future of the Uniform Crime Reporting Program."

Based on the recommendations of their 1985 report, the FBI and BJS proceeded to implement significant revisions to the UCR System which included:

- The addition of significant new offenses
- Improved quality control
- Increased information on victims, offenders and arrestees
- Expanded user services

The major revision was the change from summary-based to incident-based reporting (IBR). Under IBR, information on each offense, offender, victim, and arrestee is linked by a common incident number.

Based on the success of a pilot project in South Carolina, the FBI released the final data elements and offense specifications in July, 1988. Since that time, a few state programs have commenced staged-implementation of the enhanced program, now known as the National Incident Based Reporting System (NIBRS).

Due to the increased reporting requirements of the new program, the FBI is encouraging a phased-in transition where law enforcement agencies will be able to adopt the new program as they acquire data processing capabilities. It is anticipated that many states will be operating a dual collection program, with some departments reporting under summary-based guidelines while others with automated records systems will make a quick transition.

In concert with national initiatives, Nevada began its UCR program to meet local agency submission capabilities and is moving toward the more complete and complex NIBRS Program only as local agencies can accommodate the changes.

## **CRIME FACTORS**

---

Statistics gathered under the Uniform Crime Reporting Program are submitted by the law enforcement agencies of Nevada and represent a spectrum of crime on statewide, county and municipal levels. Awareness of the presence of unique variables is necessary if fair and equitable conclusions are to be drawn. These crime-influencing factors are present, to some degree, in every community and their presence affects, in varying degrees, the crime developments of the community. Comparison of crime figures between communities should not be made without first considering individual factors present in each community. Crime, as an outgrowth of society, remains a social problem of grave concern and the police are limited in their role as to its detection and suppression. As stated by the President's Commission on Law Enforcement and Administration of Criminal Justice in their report, "The Challenge of Crime in a Free Society," (1967-Page 92);

*"But the fact that the police deal daily with crime does not mean that they have unlimited power to prevent it, or reduce it, or deter it. The police did not create and cannot resolve the social conditions that stimulate crime. They did not start and cannot stop the convulsive social changes that are taking place in America."*

*"They do not enact the laws that they are required to enforce, nor do they dispose of the criminals they arrest. The police are only one part of the criminal justice system; the government is only one part of society. Insofar as crime is a social phenomenon, crime prevention is the responsibility of every part of society. The criminal process is limited to case by case operations, one criminal or one crime at a time."*

## CRIME FACTORS

---

Set forth in the following are some of the conditions which will, by type and volume, affect crime that occurs from place to place:

- Size and density of community population and the degree of urbanization in the surrounding area
- Compositions of population with particular reference to youth concentration
- Economic status of population, median income and job availability
- Relative stability of population, including commuters, seasonal, and other transient types
- Modes of transportation and area highway systems
- Climate, including seasonal weather conditions
- Cultural conditions such as educational, recreational, and religious characteristics
- Standards governing appointments to the police force
- Policies of prosecuting officials, the courts, correctional and parole/probation officials
- Effective strength of law enforcement agencies
- Attitude of the public toward reporting crime and participation in the prosecution of offenders
- The administrative and investigative efficiency of local law enforcement agencies, including the degree of adherence to crime reporting standards
- Organization and cooperation of adjoining and overlapping police jurisdictions

The primary goal of this program is to identify crime and related problems. Statistics in this publication should not be used to measure or evaluate workloads and results of individual contributing departments. While most police agencies are collectively viewed as crime-fighting units, considerable independent research shows only a small portion of the workload of many departments is spent fighting crime. Because of other assigned duties, the peculiar cycle of crime and clearances, and different community factors that normally affect crime statistics, no conclusions regarding individual departments should be made without consulting directly with the agency being analyzed.

Crime rates in this publication are based on the resident population of the state and its subdivisions as established and published by the Nevada Department of Taxation and Nevada State Demographer. Population estimates are revised annually. Seasonal population figures are too inaccurate and fluctuate too rapidly to be used in determination of crime rates. Most Nevada communities experience rather wide seasonal population fluctuations due to the nature of the state's major industry - gaming/tourism. Accordingly, actual crime rates per thousand reported here may appear higher than might be expected for a community of comparable size without substantial fluctuations. This should not deter police administrators from using the data for planning and administrative purposes. Local seasonal population data is available which can be utilized for further statistical refinements.

Additionally, readers are cautioned not to make direct comparisons between crime rates reported for Nevada communities and those of communities of similar size in other states without first carefully analyzing and applying local modifying factors.

## POTENTIAL USES of UCR DATA

---

The Nevada program is unique among similar state programs as it is dedicated to doing more than just gathering statistics. The program is dedicated to providing statistical support services to its contributors and in producing a variety of reports, or crime profiles, on an as-needed basis. These crime profiles will set the stage for extensive use of the data by police administrators and other criminal justice agencies.

Persons reading this report may question, "How good are Uniform Crime Reports and how may they be used?" Initial responses which come to mind may be limited, but as the information is examined more closely, many and varied uses are discovered. Foremost is keeping the public informed as to the volume and nature of crime, that they may judge and act accordingly. In actuality, UCR is a multi-faceted vehicle of many uses. Here are a few, but by no means all, as they relate to different groups and agencies.

## **POTENTIAL USES OF UCR DATA**

---

### **Law Enforcement Contributors**

Administrative information relating to:

1. Budget - need and justification
2. Staffing - number needed as to state average number of employees vs. population and crime rate
3. Department composition - Patrol, Administration, Jail, Laboratory, Detective Division, Juvenile
4. Identified problem crimes
5. Disbursement of personnel and shifts in accordance with the crime picture of individual communities with avoidance of duplication of services in cases of concurrent jurisdiction
6. Training - according to crime problem prioritization
7. Equipment procurement - by justified need
8. Selective enforcement - by crime volume, particular times and seasons through UCR information
9. Crime Profiles - identification of problems unique to individual communities
10. Long-range Planning - as anticipated by crime trends

### **Governor and Legislature**

1. Broad, accurate picture of crime in Nevada by location, volume, type and rate, as derived from records of all reporting enforcement agencies
2. Guide to valid funding needs of special interest groups and their requests for same
3. Need for more or fewer specialized programs
4. Identification of crime trends and their relationship(s) to training, courts, corrections and other criminal justice agencies
5. Identification of various social problems relating to drugs, alcohol, juveniles and rehabilitation
6. Effectiveness of various social programs related to the above

### **Courts - Prosecution**

1. Valuable general research information on crimes within the areas being served
2. Crime trend information
3. Identification of problem crimes to be considered in the prosecutorial and judicial processes

### **Press**

A factual source for use in reporting crime and socially-related problems

### **Social Agencies**

1. Identification of problem areas for concentration of remedial activities
2. Application for general evaluation of programs effectiveness

### **Educational Institutions**

Educators at all levels can use UCR data for various studies, budget preparation and planning.

These are a few possible uses, undoubtedly many more exist. The larger the UCR data base becomes, the clearer its value will become. Since effective problem solving begins with problem identification, UCR will continue to be meaningful for years to come.

Nevada UCR believes the data provided here can serve as a catalyst for some departments to establish modern record systems for the first time. With other agencies it may spur emplacement of needed system upgrades. This will enable administrators at the chief and sheriff levels to be able to take a renewed look at their departments, potentially effecting beneficial internal operational changes. An awareness by subordinate personnel that their reports and arrest information are being used, not just filed away, will result in better and more comprehensive reporting. Finally, the periodic release of crime information to the general public will keep the crime problem in its proper perspective.

## REPORTING PROCEDURE

---

In Nevada's Uniform Crime Reporting Program, contributing law enforcement agencies are wholly responsible for compiling their own crime reports and submitting them to the Uniform Crime Reporting Section of the Highway Patrol in Carson City. The UCR Section, to maintain data quality and uniformity, furnishes to the contributing agencies continuous training and instruction in Uniform Crime Reporting procedures. All contributors are also given data submission guidelines, report forms and a State of Nevada UCR Guide which outlines, in detail, procedures to score and classify offenses. The guide illustrates and discusses the monthly and annual report forms and provides a P.O.S.T. certified lesson plan covering the eight crime index categories.

A centralized record system is vital to the sound operation of any law enforcement agency. It is an essential element for crime reporting. Trained UCR personnel at the state level assist contributors in following established reporting procedures.

On a monthly basis, law enforcement agencies (state, county and municipal) report the number of offenses that become known to them in the following crime categories:

1. **Criminal Homicide**
  - a. Murder and Non-Negligent Manslaughter
  - b. Manslaughter by Negligence (not an index crime)
2. **Forcible Rape**
  - a. Rape by Force
  - b. Attempts to Commit Forcible Rape
3. **Robbery**
  - a. Firearm
  - b. Knife or Cutting Instrument
  - c. Other Dangerous Weapon
  - d. Strong-Arm (Hands, Fists, Feet, etc.)
4. **Assault**
  - a. Firearm
  - b. Knife or Cutting Instrument
  - c. Other Dangerous Weapon
  - d. Hands, Fists, Feet, etc, Aggravated
  - e. Hands, Fists, Feet, Not Aggravated (not an index crime)
5. **Burglary**
  - a. Forcible Entry
  - b. Unlawful Entry - No Force
  - c. Attempted Forcible Entry
6. **Larceny-Theft (except motor vehicle theft)**
7. **Motor Vehicle Theft**
  - a. Autos
  - b. Trucks and Buses
  - c. Other Vehicles
8. **Arson**

In addition, the agencies submit the number of arrests recorded, by sex and age, for twenty one other "Part II" offenses. Descriptions of these offenses are provided beginning on page 223.

Another facet of the UCR Program involves the collection of "hate crimes." In 1990, the President of the United States signed into law the "Hate Crime Statistics Act of 1990". The data identifies crimes that manifest evidence of prejudice based on race, religion, sexual orientation, ethnicity and physical or mental disabilities.

---

## REPORTING PROCEDURE

---

Whenever complaints of crime are determined through investigation to be unfounded or false, they are subtracted from the actual count. The number of "actual offenses known" in these crime categories is reported to the Nevada UCR Unit whether or not anyone is arrested for the crime; the stolen property is recovered; prosecution is undertaken; or any other restrictive consideration is in effect.

Other data configurations which contributing agencies tally through the UCR system:

- Number of crimes cleared by arrest or exceptional means
- Number of crimes cleared involving persons under age 18
- Number of enforcement officers killed or assaulted
- Type and value of property stolen and recovered
- Number of arrests for all criminal acts(except traffic violations), broken out by arrestee age, sex and race
- Number of sworn and civilian enforcement personnel employed by agency type
- Number of "hate crimes"

---

## HIERARCHY RULE

---

The experience of law enforcement agencies handling UCR data shows that, for the most part, offenses of law occur singly as opposed to many being committed simultaneously. In these single-offense situations, it must be decided whether the crime was one of the index offenses, and if so, it is scored accordingly. However, if several offenses are committed at the same time by a person or a group of persons, a different approach must be used in classifying and scoring. As a general rule, a multiple-offense situation requires classification of each of the offenses, and identification of those which are Part I crimes. The Part I offenses involved must then be located within their ranked list, which goes from most to least priority (this list is provided starting on page 221). The offense which is highest on the list is scored. The other offenses involved in the incident are ignored. The Hierarchy Rule, which requires counting only the highest offense on the list and ignoring all others, applies only to crime reporting and does not affect the number of charges for which the defendant may be prosecuted in the courts.

---

## VERIFICATION PROCEDURE

---

Data uniformity and accuracy is of primary concern under this program. With coverage of approximately 36 reporting jurisdictions within the State of Nevada, the problems with attaining uniformity are apparent. Issuance of instructions and training of personnel within contributing agencies does not complete the role of the UCR Section. It is standard operating procedure to examine each incoming report for mathematical accuracy and completeness, and perhaps of even greater importance, for reasonableness as a possible indication of error.

Clearance factors, recovery rates and other elements are scrutinized and changes are suggested to the contributors where needed. In the instance of minor mathematical corrections, the contributing agency is either contacted by phone or in-person visitations are made by qualified UCR program personnel.

The possibility of report duplication requires constant verification through internal consistency checks. If duplication is suspected, the contributing agency is immediately contacted and the matter is resolved in accordance with guidelines. Continual analysis of reports is maintained to assist contributors when needed and to maintain the quality necessary for a factual and successful program. In addition, quality assurance staff visit contributors to cooperatively assist in necessary revisions of records and reporting methods.

Regardless of the extent of the quality control process employed by the Uniform Crime Reporting Section, the accuracy of the data assembled under this program depends on the sincere effort exerted by each contributor to meet the necessary standards of reporting. We are especially grateful to the UCR support staff in each contributing agency for their diligence and persistence, and their constant attention to reporting policies and procedures.

---

## **STATEMENT OF POLICY FOR RELEASE OF UCR STATISTICAL INFORMATION**

---

The following policies provide guidance concerning the release of UCR statistical information. All information to be released is approved by senior staff prior to being released.

1. Nevada UCR will publish annual and monthly reports, reflecting crime in the state. These reports will be distributed without charge to the governor, members of the legislature, the attorney general, law enforcement agencies and any agency or committee dedicated to law enforcement or criminal justice work.
2. Published reports will be released to the above named entities prior to being released to individuals or agencies extraneous to the criminal justice community.
3. UCR statistical information concerning any individual agency will not be released to any entity or agency, if the information has not previously been published, without the written consent of the chief administrator of that agency. The Uniform Crime Reporting Section will maintain, for one year, a copy of the information released along with the request and the authority of release.
  - A. Information contained in the published annual report may be released via telephone, letter, etc., to any interested party.
  - B. All requests for unpublished information should be directed by letter to the Program Supervisor, UCR Section. These special requests will be honored only with the written consent of the agency whose statistics are requested.
  - C. Law enforcement agencies may receive interim, unpublished, specialized reports germane to their agency upon request.

## PROFILE OF THE STATE OF NEVADA

---

*This profile is presented to provide some general knowledge and facts about the State of Nevada. The information might assist users of this publication in understanding the environment in which reported crime incidence and arrest data occurred.*

### NEVADA FACTS AND FIGURES

—Nevada is the seventh largest state in the United States, covering 110,540 square miles. The state's long western border is shared with California, the most populous state in the union. On its northern and eastern borders are the states of Oregon, Idaho, Utah and Arizona. The state's longest distance from the northwest corner to the southern tip is approximately 600 miles. At the widest point it is nearly 350 miles.

—Nevada consists of seventeen counties, ranging in size from 144 square miles for the state capitol of Carson City to over 18,000 square miles for Nye County, one of the largest counties in the United States.

—The geography of the state consists of rugged desert and mountain terrain, with the highest mountain peak (Boundary Peak in Esmeralda County) having an elevation of 13,146 feet above sea level and the lowest point on the Colorado River having an elevation of 490 feet.

—Nevada has a four-season climate, with wide variations between its northern and southern latitudes. Low temperatures in the north can go well below zero in the winter months, while high temperatures in the south can climb well over one hundred in the summer (degrees Fahrenheit). It is the most arid state in the country, receiving an annual average of less than ten inches of precipitation.

—Of Nevada's total land area, 85.3% is controlled by the federal government, state and local governments control .3% and 1.6% falls under the jurisdiction of 22 American Indian reservations. Very large areas have been reserved by the United States military, which has a significant presence.

—Nevada's population increased by over 54% between 1980 and 1990 (from 800,508 to 1,236,130), and by 50% from 1990 to 1998 (1,236,130 to 1,855,790). The state has experienced the fastest rate of growth in the nation for the past several years. Due to these tremendous long-term increases, several communities have been hard-pressed to provide necessary infrastructures. This trend is expected to continue, although possibly at a slightly lower rate. Despite this growth, Nevada remains one of the most sparsely populated states, with about 17 people per square mile. Fully 84% of the state's total population is located in the counties of Clark (1,255,200) and Washoe (311,350).

—The Nevada State Demographer-University of Nevada, Reno, estimated the following population composition for Nevada in 1998: White, 87.4% (includes Hispanic, 12.9%); African Americans, 7.5%; Asian and Pacific Islanders, 3.3%; Native American Indians, 1.8%; Youth under age 19, 28.7%; Elderly aged 55 and over, 21.3%.

—Tourism and gaming are the state's largest industries. The gaming industry generated monthly average taxable revenues of \$649.2 million in 1998. Over 42 million persons visited in 1998. Of concern to Nevada is the rapid spread of gaming to other states and Indian reservations. The Las Vegas area has responded by expanding and building huge "destination" or "theme" resorts, catering to a broader spectrum of interests.

—A substantial ongoing effort has been successfully undertaken to diversify Nevada's economy. Hundreds of out-of-state firms have relocated to Nevada and thousands of new businesses have opened.

—Nevada is the largest gold producer in the United States and ranks in the top ten in the world. The bulk of this mining boom has occurred within the past ten years and has primarily taken place in the rural northern part of the state. One third of Nevada's rural counties have experienced annual growth rates of 30% or more during this period.

*The crime clock should be viewed with care. Being the most aggregate representation of UCR data, it is designed to convey the annual reported crime experience by showing the relative frequency of occurrence of the Index Offenses. This mode of display should not be taken to imply a regularity in the commission of the Offenses, rather, it represents the annual ratio of crime to fixed time intervals.*

Crime rates as they appear in this publication are per 1,000 population. No attempt is made to incorporate transient populations or other factors which contribute to the ratio and types of crime in given areas. Any effort to make comparisons of crime rates between areas should be tempered by these population and environmental variables.

# VIOLENT CRIMES

## Crime Clock - One Violent Crime Every 46 Minutes, 43 Seconds

Crimes of violence involve the element of personal confrontation between the perpetrator and victim and entail the threat or use of violence. By their very nature, violent crimes (murder, rape, robbery and aggravated assault) are considered more serious than property crimes. The total number indicates only the number of incidents reported to enforcement and does not reflect the number of criminals who committed them or the number of injuries inflicted.

The 1998 violent crime rate in Nevada was 6.1 offenses per 1,000 population. Violent crimes represented 12.1% of all reported index crimes. Enforcement cleared 4,221 violent crimes for a 37.5% clearance rate.

# PROPERTY CRIMES

## Crime Clock - One Property Crime Every 6 Minutes, 26 Seconds

Property crimes include burglary, larceny, motor vehicle theft and arson. These crimes do not involve the threat of violence, but entail property taken from one by another, or the destruction of property by arson. Because arson is the most recent addition to the crime index, to this point in time, the FBI has not fully reported it along with the other offenses. The reason for this is not all agencies participating in the UCR Program have consistently reported arson information, thus data reliability is still marginal.

There were 81,673 property crimes reported in 1998, representing 87.9% of total reported index crimes. Enforcement agencies cleared 16,188 (19.8%) of the property offenses. Nevada's property crime rate per 1,000 population in 1998 was 44.01.

# MURDER AND NON-NEGLIGENT MANSLAUGHTER

## Crime Clock - One Murder Every 2 Days, 2 Hours

Murder and non-negligent manslaughter are described by UCR as the willful (non-negligent) killing of one human being by another, or, if the death is the result of the commission of another criminal act.

*Murder--NRS 200.010: "Murder is the unlawful killing of a human being with malice aforethought, either express or implied, or caused by a controlled substance which was sold, given, traded or otherwise made available to a person in violation of Chapter 453 of NRS."*

*Manslaughter--NRS 200.040: (1) "Manslaughter; (a) is the unlawful killing of a human being, without malice express or implied, and without any mixture of deliberation...(2) Manslaughter must be voluntary, upon a sudden heat of passion, caused by provocation apparently sufficient to make the passion irresistible; or, involuntary, in the commission of an unlawful act..."*

Included in this publication's count for this offense classification are deaths caused by negligence. Although manslaughter by negligence is recorded on the "offense known to police" form along with murder, it is not considered by the FBI to be an index offense. Attempts to murder or assaults to murder are scored as aggravated assaults and not murder.

\*Due to the unlimited set of possible circumstances surrounding homicides, it is difficult to provide clear-cut or precise statistical categories for all. To achieve uniformity, the number of circumstance categories has been kept to a minimum. Caution is suggested in drawing generalizations from the data without more deliberate analysis. This table makes no attempt to analyze the motives of offenders, but rather to display general circumstances surrounding events.

\*\*The number of relationships may not agree with the number of victims due to instances of multiple offenders or victims.

# FORCIBLE RAPE

## Crime Clock - One Rape Every 9 Hours, 37 Minutes

Forcible rape, as defined in the UCR Program, is the carnal knowledge of a female forcibly and against her will. Assaults or attempts to commit rape by force or threat of force are also included. Statutory rape (without force) and other sex offenses are excluded.

*Sexual Assault--NRS 200.366: (1) "A person who subjects another person to sexual penetration, or who forces another person to make a sexual penetration on himself or another, or on a beast, against the victim's will or under conditions in which the perpetrator knows or should know that the victim is mentally or physically incapable of resisting or understanding the nature of his conduct, is guilty of sexual assault."*

Forcible rape differs from other violent crimes in that the victim, in many cases, is reluctant to report the offense to police. The investigation by police, medical examination, court procedure, embarrassment and fear of accompanying stigma all have a deterrent effect on the victim's willingness to make the offense known to police.

Not unlike national trends, most forcible rapes in Nevada in 1998 occurred during spring and summer months. The months of March through August accounted for 399 (43.8%) of the yearly total of 911. August had the highest monthly total at 98 (10.8%).

In 1998, Nevada's rate per 1,000 population was .49. In comparison, the 1997 national rate was .57. Nevada has experienced significantly higher rates than the nation as a whole for several years, however, it has dropped substantially since 1994 when it was .71.

Law enforcement was able to clear 35.2% of forcible rapes in 1998.

# ROBBERY

## Crime Clock - One Robbery Every 1 Hour, 58 Minutes

Robbery is defined by UCR as "the felonious and forcible taking of the property of another against his will by violence or by putting him in fear." All attempts of robbery are included in the UCR report.

*Robbery, NRS 200.380: "Robbery is the unlawful taking of personal property from the person of another or in the presence, against his will, by means of force or violence or fear of injury, immediate or future, to his person or property, or the person or property of a member of his family, or of anyone in his company at the time of the robbery. A taking is by means of force or fear if used to: (a) Obtain or retain possession of the property; (b) Prevent or overcome resistance to the taking; or (c) Facilitate escape. The degree of force used is immaterial if it is used to compel acquiescence to the taking of or escaping with the property. A taking constitutes robbery whenever it appears that, although the taking was fully completed without the knowledge of the person from whom taken, such knowledge was prevented by the use of force or fear."*

# AGGRAVATED ASSAULT

## Crime Clock - One Aggravated Assault Every 1 Hour, 32 Minutes

An aggravated assault is an attempt or offer, with unlawful force or violence, to do physical injury to another. This type of assault is usually accompanied by the use of a weapon or other means likely to produce death or serious bodily injury. Attempts are included since it is not necessary that an injury result when a gun, knife, or other weapon is used which could and probably would result in serious personal injury if the crime is successfully completed. Assaults with personal weapons (hands, fists, feet) are scored as aggravated if there is personal injury requiring more than simple first-aid to treat.

*Assault--NRS 200.471. (1) "...means an unlawful attempt, coupled with a present ability, to commit a violent injury on the person of another..." (2) (b) "...use of a deadly weapon, or the present ability to use a deadly weapon..."*

*Battery--NRS 200.481. (1) (a) "...means any willful and unlawful use of force or violence upon the person of another..."*

Not included in this class are simple (non-aggravated) assaults. Simple assaults are non-index offenses, although a record is kept of these assaults on the 'Offenses Known to Police' form. During 1998, there were 25,141 simple assaults reported in Nevada, with a clearance rate of 56.4%.

There were 5,710 aggravated assault offenses reported to enforcement in 1998. Nevada law enforcement cleared 2,714 aggravated assaults (47.5%).

# MOTOR VEHICLE THEFT

## Crime Clock-1 Motor Vehicle Theft Every 38 Minutes, 11 Seconds

Uniform Crime Reporting defines motor vehicle theft as the larceny or attempted larceny of a motor vehicle, including joy riding." Excluded from this class is a reported offense where there is lawful access to the vehicle, such as a family situation or unauthorized use by others with lawful access, such as with employees.

Motor vehicles are defined by UCR as self-propelled vehicles that run on the surface of the land and not on rails, such as automobiles, trucks, buses, motorcycles, motor scooters, snowmobiles, ATV's, etc. Not included are farm equipment, construction equipment, airplanes, motorboats.

*Motor Vehicle Theft--NRS 205.2715: "(1) Every person who takes and carries away or drives away the vehicle of another without the intent to permanently deprive the owner thereof but without the consent of the owner of such vehicle is guilty of a gross misdemeanor. (2) Every person who is in possession of a vehicle without the consent of the owner of such vehicle may reasonably be inferred to have taken and carried away or driven away the vehicle."*

Motor vehicle thefts occurred most frequently during the months of January (1,270), March (1,407), April (1,239) and August (1,179). These months collectively accounted for 37.0% of 1998's total motor vehicle theft offenses.

Law enforcement cleared 1,614 (11.7%) of all motor vehicle thefts in Nevada in 1998.

## Crime Clock - One Arson Every 13 Hours, 8 Minutes

Arson was the eighth and latest index offense to be added to the UCR Program by congressional mandate in 1979. Since only 11,461 agencies covering 74% of the United State's population submitted reports for all 12 months of the year, data users should be aware that the figures do not represent the Nation's total arson experience. Caution is recommended when viewing arson trend information. Figures may have been influenced by improved arson reporting procedures. It is expected that year-to-year statistical comparability will improve as collection continues.

Nationally, 81,753 arsons were reported in 1997. The national overall rate of arson per 1,000 population was .41. Regionally, the highest arson rate in 1997 was in the Midwestern States, with .46 per 1,000 population. There were 667 arsons reported in Nevada in 1998, compared to 729 in 1997. Nevada's 1994 and 1995 rate per 1,000 population was .47, compared to .41 in 1997 and .36 in 1998.

*Arson--NRS 205.005: "Any person shall be deemed to have set fire to a building, structure or any property mentioned in NRS 205.010 to 205.030, inclusive, whenever any part thereof or anything therein shall be scorched, charred or burned."*

In 1998, arson offenses in Nevada occurred most frequently during the months of May (63), June (64) and July (69). These months represented 29.4% of the year's total. Law enforcement cleared 94 (14.1%) of reported arson offenses in 1998.

## JURISDICTIONS OF HIGHEST INCIDENCE

### Numbers and Rates, 1994 - 1998

# CLEARANCE RATES

For Uniform Crime Reporting purposes, a crime index offense is cleared when a law enforcement agency has identified the offender, there is enough evidence to charge him and he is actually taken into custody. The arrest of one person can clear several crimes, or several persons may be arrested in the process of clearing one crime.

Crime solutions are also recorded in exceptional circumstances when some elements beyond law enforcement control preclude formal charges against the offender. An offense may be exceptionally cleared when it falls into one of the following categories:

1. The offender commits suicide
2. A double murder occurs (two persons kill each other)
3. The offender dies after making a confession (dying declaration)
4. The offender is killed by law enforcement officers
5. The offender confesses to committing a crime while already in custody for another crime or serving a sentence for another crime
6. The offender is prosecuted in another city for a different crime or the same crime by federal, state or local authorities, and the other jurisdiction refuses to release the offender
7. Another jurisdiction refuses to extradite the offender
8. The victim of a crime refuses to cooperate in the prosecution
9. The offender is prosecuted for a less serious charge than the one for which he was arrested
10. The offender is a juvenile who is handled by a verbal or written notice to the parents in instances involving minor offenses such as petit or simple larceny

During 1998, 22.0% of reported index crimes in Nevada were cleared, either by arrest or exceptional means. The percentage of violent crimes cleared in Nevada in 1998 was 37.5% compared to the national 1997 figure of 48%, while property crime clearances were 19.8% compared to the national 1997 level of 18%.

## ARREST DATA

Primarily a gauge of law enforcement's response to crime, arrest counts also provide definitive data concerning the age, sex and race of perpetrators. Arrest practices, policies and enforcement emphases vary from place to place and even within a community from time to time. While the practices for certain unlawful conduct such as drunkenness, disorderly conduct, vagrancy and related violations may differ among agencies, those for robbery, burglary and other serious crime arrests are more likely to be uniform and consistent throughout all jurisdictions. The UCR Program's procedures require that an arrest be counted on each separate occasion a person is taken into custody, notified or cited. Annual arrest figures do not measure the number of individuals arrested since one person may be arrested several times during the year for the same or different offenses. For UCR purposes, a juvenile is counted as 'arrested' when the circumstances are such that if he or she were an adult an arrest would result, but in fact, there may not have been a formal charge.

Nationwide, law enforcement agencies made an estimated 15.2 million arrests in 1997 (the latest figures available) for all criminal infractions except traffic violations. When the overall arrest volume was related to the total United States population, the rate was 57.5 arrests per 1,000 inhabitants. In Nevada, enforcement reports to UCR in 1998 indicated a total arrest figure of 142,388. The arrest rate per 1,000 in population for the state was 76.7.

### During 1998:

- 16.6% of all arrests were juveniles, 83.4% were adults

- Index Offenses accounted for 25.1% of juvenile arrests

For Adults, 13.9% of arrests were for index offenses

Over one-third (33.8%) of adult arrests were between the ages of 30 and 39.

# HATE CRIME

--It shall be unlawful for any person, maliciously and with specific intent to intimidate, harass, cause physical injury, or damage real or personal property of another person because of that person's race, color, religion, ancestry, or national origin.--

In April, 1990, a federal mandate to collect and report hate/bias crimes was passed by Congress.

Unlike other Uniform Crime Reporting data, which account for actual reported numbers of definite offenses, hate crime reporting requires rather subjective opinions regarding sensitive issues. This requires various law enforcement administrators to develop and utilize viable and appropriate responsive policies.

Accurate data collection for hate crime requires proper training of enforcement personnel in incident recognition as well as cooperation and desire of enforcement communities to report these offenses without influence of special interest groups, media and politics.

Criteria for recognizing and reporting hate crimes have been prepared and distributed to all law enforcement agencies in Nevada. Enforcement personnel training is periodically offered by the Nevada UCR Program and the Federal Bureau of Investigation.

Information reported in this category includes the offense in relation to the bias incident, motivation (anti-race, anti-religion, anti-sexual orientation, anti-ethnicity, etc.) and identification of victims' and offenders' sex, race and ethnicity.

Nevada enforcement agencies reported 58 hate/bias incidents in 1998. There were 43 reported in 1997 and 43 in 1996.

## ENFORCEMENT PERSONNEL EMPLOYMENT DATA

---

The Uniform Crime Reporting Program in Nevada compiles information on enforcement personnel statewide. Included are the total number of sworn and civilian support personnel with each agency broken out by gender. Also provided in this section are ratios of police to population.

A wide variety of factors unique to different jurisdictions affect the number of employees utilized by various law enforcement agencies to enable them to fulfill their service requirements. Because of this, persons attempting to make comparisons of population/enforcement personnel ratios between agencies/jurisdictions should do so cautiously. The State of Nevada, especially, with highly transient and seasonal population variations, has enforcement requirements which differ from many other jurisdictions.

Usage of the term "full-time sworn", when referring to enforcement personnel, does not necessarily mean they are engaged in what the public generally perceives as "regular" police duties, such as investigations, patrol, deterrence, etc. The number of personnel available for "regular" duties is affected by regulatory, correctional, administrative and special assignments. Consideration of in-house duties and responsibilities should temper comparisons of agencies.

### Sworn Personnel

- During 1998, there were 2,497 full-time sworn municipal personnel in Nevada, providing 1.37 officers per 1,000 residents for urban population areas.
- There were 1,010 full-time sworn deputies employed by Nevada's 16 sheriff's departments in 1998, and 382 troopers with the Nevada Highway Patrol. The ratio of enforcement personnel for every 1,000 population in the rural areas was 2.81.
- Statewide, there were 3,889 full-time sworn law enforcement officers in 1998. This represents an overall ratio of 2.1 officers per 1,000 Nevada residents.
- Nationally in 1997, the latest full year of data available, the average number of municipal officers per 1,000 inhabitants was 2.4. For suburban areas the number was 2.5 and for rurals the figure was 2.8.
- Regionally, the highest ratios of sworn officers to population in 1997 were recorded in the Northeastern and Southern states, where there were 2.8 and 2.7 per 1,000 inhabitants respectively. The Western states had the lowest ratio of 1.8 per 1,000.
- The nation's law enforcement community overall, in 1997, had an average of 2.5 full-time sworn personnel for every 1,000 inhabitants.

### Civilian Personnel

- Municipal police departments in Nevada in 1998 employed a total of 2,131 full-time civilians.
- Sheriff's departments statewide maintained 375 full-time civilian employees in 1998. The Nevada Highway Patrol employed a total of 184.
- The total number of full-time civilian support personnel employed statewide in 1998 was 2,690.

# **CLASSIFICATION OF OFFENSES**

---

Uniformity in reporting under the Nevada Uniform Crime Reporting System is based on the proper classification of offenses reported to or known by the police. The adoption of the National System of Uniform Crime Reporting included the utilization of the offense classifications of that system. Law enforcement in this State has made accurate application of those classifications in the reports submitted to the Nevada Uniform Crime Reporting System. In view of the need for compatibility with the National System, "offenses" under the program are not distinguished by designation of "misdemeanors", "felonies" or violations of municipal ordinances. The explanations of offense classifications may vary slightly from language used by those familiar with Nevada State Law. However, the major categories of offense classification remain the same between the national and state level.

## **PART I OFFENSES**

Offense data consists of information that has been extracted from reports of Part 1 crimes that have come to the attention of Nevada Law Enforcement Agencies. In general, Part 1 crimes are usually reported to law enforcement agencies. Part 1 crimes are comprised of the following offenses.

**General Rule** - Any unlawful entry or attempted forcible entry of any dwelling house, attached structure, public building, shop, office, factory, storehouse, apartment, house trailer (considered to be a permanent structure), warehouse, mill, barn, camp, other building, ship or railroad car.

## **PART II OFFENSES**

The Part II offenses encompass all other crime classifications outside of those defined as Part I offenses. In November 1932, the national UCR Program adopted a Standard Classification of Offenses for the compilation of criminal statistics. This classification was devised and adopted in order that law enforcement, judicial, and penal statistics might be uniformly compiled in terms of a single classification of offenses. These titles have been included as descriptive data to aid in determining the offenses that are included or excluded from each classification.

This class is limited to "suspicion" arrests where persons arrested are released by police.*

*Contains all arrests made for violations of local curfew or loitering ordinances where such laws exist.*

## **29. RUNAWAY (persons under 18)**

Arrest of runaways from one jurisdiction by another agency are counted by the home jurisdiction. Protective custody actions with respect to runaways taken for other jurisdictions are not included.*

# CALCULATION OF RATES

---

*The Uniform Crime Reporting Program provides data for police executives to measure local problems. To facilitate this function, local data must be converted into terms of rates and percentages. Simple formulas are displayed here which may assist in these computations.*

## CRIME RATES

One of the most meaningful crime statistics is the crime rate. This is the number of Part I offenses per 1,000 inhabitants. This rate can be calculated for any city, town or county.

To compute crime rates, divide the community population by 1,000 and divide the number of offenses in each class by that number. The answer is the number of offenses per 1,000 population and is the crime rate for that particular offense.

### Example:

- a. Population - 75,000
- b. Number of burglaries - 215
- Divide: 75,000 by 1,000 = 75.0
- Divide: 215 by 75.0 = 2.87
- The crime rate for burglary is 2.87 per 1,000 inhabitants.

## CLEARANCE RATES

The percentage of crimes cleared is obtained by dividing the number of offenses cleared by the number of offenses known. This answer is then multiplied by 100.

### Example:

- a. Number of clearances in robbery - 38
- b. Number of total robberies - 72
- Divide: 38 by 72 = 0.528
- Multiply: 0.528 by 100 = 52.8
- The clearance rate for robbery is 52.8%.

## CRIME TREND DATA

Local agencies can compute crime trends for a given offense for their individual agency for a particular period of time.

### Example:

- a. Auto thefts in your jurisdiction for July through December last year numbered 21.
- b. Auto thefts in your jurisdiction for July through December this year numbered 29.
- Subtract:  $29 - 21 = 8$ , notice that 8 is an increase over the past year.
- Divide: 8 by 21 = 0.38, always divide the difference by the total in the earlier time period.
- Multiply:  $0.38 \times 100 = 38.0$
- Your trend in auto theft is a 38.0% increase for the last six months of this year compared to the last six months of last year.

## POLICE EMPLOYEE DATA

Police employee rates are expressed as the number of employees per 1,000 population. To compute this rate, divide the population by 1,000 and divide the number of enforcement employees by this number.

### Example:

- a. Your jurisdiction's population - 75,000
- b. Your agency's number of employees - 102
- Divide: 75,000 by 1,000 = 75
- Divide: 102 by 75 = 1.36
- Your employee rate is 1.36 employees per 1,000 population.

# **DOMESTIC VIOLENCE IN NEVADA**

**January – December, 1998**

**Crime Clock – One Domestic Violence incident every 32 minutes, 16 seconds<sup>1</sup>**

*Domestic Violence – NRS 217.400: “(a) The attempt to cause or the causing of bodily injury to a family or household member or the placing of the member in fear of imminent physical harm by threat of force. (b) Any of the following acts committed by a person against a family or household member, a person with whom he had or is having a dating relationship or with whom he has a child in common, or upon his minor child or that person:*

- (1) A battery.*
- (2) An assault.*
- (3) Compelling the other by force or threat of force to perform an act from which he has the right to refrain or to refrain from an act, which he has the right to perform.*
- (4) A sexual assault*
- (5) A knowing, purposeful or reckless course of conduct intended to harass the other. Such conduct may include, without limitation:*
  - (I) Stalking.*
  - (II) Arson*
  - (III) Trespassing.*
  - (IV) Larceny.*
  - (V) Destruction of private property.*
  - (VI) Carrying a concealed weapon without a permit.*
- (6) False imprisonment.*
- (7) Unlawful entry of the other’s residence, or forcible entry against the other’s will if there is a reasonably foreseeable risk of harm to the other from the entry.”*

*NRS 171.1227: “Peace officer to submit written report concerning suspected acts of domestic violence; copy of report to be forwarded to central repository.”*

In accordance with NRS 171.1227 the state’s Uniform Crime Reporting (UCR) Program assumed responsibility for the collection of domestic violence statistics on a statewide basis. To facilitate the collection of data in a uniform manner, the UCR Technical Subcommittee designed and presented the “State of Nevada Domestic Violence Statistical Form” to the state’s UCR Advisory Committee for recommendation to the Director of the Department of Motor Vehicles and Public Safety for adoption and implementation statewide. On January 1, 1998 this statistical instrument was available for use statewide by 35 Nevada law enforcement agencies. The majority of those agencies have successfully implemented the use of the form in support of the program’s data collection efforts. Appendix A provides a copy of the “State of Nevada Domestic Violence Statistical Form”.

<sup>1</sup> The crime clock should be viewed with care. It is designed to convey the reported crime experience by showing the relative frequency of occurrence. This mode of display should not be taken to imply regularity in the commission of the offenses, rather, it represents the ratio of crime to fixed time intervals.

## POPULATION AND CRIME RATES FOR DOMESTIC VIOLENCE

**Crime Rate** – The Nevada Domestic Violence Crime Rate is based on the occurrence of all reported incidents per 1,000 residents of the state. The state population utilized was 1,855,790, the latest available estimates for 1998 from the Nevada State Demographer's Office as of 02/22/99. A total of 16,293 domestic violence incidents were reported in 1998. As such, the crime rate for domestic violence in Nevada is 8.8 per 1,000. The County Domestic Violence Crime Rate is also based on the occurrence of all reported incidents in a county per 1,000 residents of that county. To compute the crime rate, divide the state/county population by 1,000 and divide the number of offenses by that number. Appendix B provides each county total and population.

# County Totals

Incidents of domestic violence occurred most frequently on Saturday (2,751) and Sunday (2,946). Their cumulative number (5,697) represented 35% of the total.

The hours between 6pm and 12am experienced the most incidents of domestic violence (6,760). This represented 41.5% of the total. Conversely, the fewest domestic violence incidents occurred between 3am and 9am (2,046) representing 12.6% of the total.

## VICTIMS AND OFFENDERS

The following tables display the number of victims and offenders by gender, age and race. *The number of victims and offenders may not be exactly relational to the total number of incidents due to: 1) multiple victims or offenders in one incident, or 2) an incident where the aggressor was undetermined, in which case, there are 2 victims and/or 2 offenders for one incident.*

A total of 16,456 victims and 16,801 offenders were reported in 1998.

Total	9,520	3,137	2,750	627	131	47	233	111	164	81

Females were victims in 76.0% and offenders in 24.6% of reported cases. Males, conversely, were victims in 25.2% and offenders in 78.5% of reported cases.

Children were present in 6,060 incidents, representing 37.2% of incidents.

Cohabitant (38.2%) and spouse (30.3%) were the most common relationships of victims to offenders. *The total number of relationships may not be equal to the total number of victims. While the majority of reports indicated only one relationship, it is also possible to have more than one relationship or participants in an incident.*

Reports indicate that only 22.5% of all victims were under the influence of alcohol or drugs, while 40.4% of all offenders used alcohol or drugs at the time of the offense.

44.0% of injuries were reported as minor. Medical treatment was refused in 67.8% of all incidents. *This number may be skewed due to the lack of consistency in reporting the 'severity of injuries' and 'medical treatment received' by some of the larger contributing law enforcement agencies.*

## OFFENSE AND ARREST SPECIFICS

In 1998, 8,739 arrests were reported for a total of 53.6% of all cases. Only 384 restraining orders were reported to be active at the time of the incidents. *Not all reports indicate whether a restraining order was in place.*

The primary aggressor was determined by "corroborating statements" 43.3% of the time. There were 8,044 mitigating circumstances given for no arrest of the offender. "Gone upon arrival" (5,020) was by far the most common at 62%. *More than one "mitigating" circumstance is possible for each incident.*

The most often used weapons were hands, fists, feet, etc... (13,707) representing 86.7% of the total number of weapons used. This includes incidents where more than one weapon was used. The numbers may also be slightly skewed due to the lack of consistency in reporting weapons used.

During the act of domestic violence, other crimes are sometimes committed. Of the associated crimes reported, Property Destruction was most often committed by both men and women, equaling 4.3% of all incidents.

# **AUTHORITY**

The sixty-sixth session of the Nevada Legislature voted to create a Uniform Crime Reporting Program within the Nevada Highway Patrol in 1991.

## **NRS 179A.076**

**Uniform program for reporting crimes; advisory committee to assist in establishing and carrying out program.**

1. The director of the department shall establish within the central repository, a uniform program for reporting crimes which is designed to collect statistical data relating to crime or delinquency of children and to facilitate the collection and analysis of statistical data relating to crime at a central location.
2. To assist in establishing and carrying out the program required by subsection 1, the director shall establish an advisory committee consisting of seven members selected by the director. The committee must be composed of:

  - (f) One member who represents the Nevada Highway Patrol; and
  - (g) One member who represents the University of Nevada System and has knowledge of the criminal justice System.
3. The members of the advisory committee are not entitled to receive compensation while engaged in the business of the advisory committee.
